PROFESSIONAL SUMMARY

A Certified Energy Manager (CEM®) and Certified Measurement & Verification Professional (CMVP®) with over a decade of experience in electrical and energy engineering. Specializes in project management, telecom power systems, energy-efficient solutions, and technical operations across diverse infrastructure. Strong expertise in data collection, energy analysis, facilities management, structured reporting, and AI-driven dashboards. Holds a B.Sc. in Electronic Control Engineering with certifications in LEED Green Associate, SCADA systems, Machine Learning, and Power BI. Fluent in English and Arabic. Committed to driving operational excellence, improving system reliability, and delivering measurable results through disciplined engineering.

AI & DEVELOPMENT

AI & Automation

- Designed Python-based automation to streamline energy performance reporting and KPI tracking.
- Developed ML-based anomaly alerts for telecom site power consumption behavior.
- Built governance-ready Energy & Environmental dashboards for CO2 footprint monitoring.
- Applied Power BI, SQL Server, and DAX to model operational trends across multi-site networks.

Development & Tools

- Created troubleshooting guides and diagnostic scripts for SCADA / PLC / DCS systems.
- Documented API-style checklists to standardize field data capture and site integrations.
- Version-controlled documentation and engineering templates using Git/GitHub workflows.

EXPERIENCE

2019 – Present

Electrical Project Engineer

ACES · Riyadh

- Energy Manager & efficiency designer across STC COW and Mobily ENM networks.
- O&M Engineer for Mobily ENM Managed Services — full facility & CAFM/BMS oversight.
- O&M Engineer for STC COW Managed Services — 600+ nationwide telecom sites.
- Developed technical troubleshooting & preventive maintenance documentation.
- Designed energy optimization initiatives achieving up to 18% utility cost reduction.
- Mentored junior engineers and standardized field engineering practices.

2018 – 2019

Electrical Project Engineer

Absar · Riyadh

- Executed SEC unified-contract builds for 60+ MV/LV electrical assets.
- Installed RMUS, transformers, LV switchgear, and mini-pillars.
- Full commissioning, testing, and zero-defect SEC handover documentation.
- SCADA monitoring, integration, and control system setup.

2017 – 2018

Electrical Engineer

BEMCO

- Preventive and corrective maintenance for 11kV distribution networks.
- Developed standardized testing, inspection, and commissioning manuals.
- Managed NCR resolutions and technical documentation workflows.

2012 – 2017

Electrical Engineer

SEC Thermal Generation · Sudan

- Operations and maintenance for a 200 MW thermal generation block.
- Managed wastewater treatment systems (PH meters / OC 4000 DCS).
- Preventive maintenance and fault management for 11kV distribution systems.

KEY PROJECTS

■ **STC COW Network — O&M + Energy Optimization**

End-to-end O&M for 600+ telecom sites. Achieved up to 18% utility cost reduction through systematic energy auditing.

■ **Mobily ENM Managed Services**

Full O&M and facility operations including CAFM/BMS integration and outage prevention.

■ **Mobily Data Center Energy Audit**

Comprehensive energy audit delivering measurable PUE improvements across critical DC infrastructure.

■ **SEC Unified Contract — MV/LV Commissioning**

Installation and commissioning of 60+ MV/LV assets with full SCADA integration and SEC handover.

■ **PP12 Thermal Generation — 200 MW Plant Operations**

Day-to-day operations including 11kV switching, safety routines, and DCS-based environmental monitoring.

■ **AI CO2 Dashboard — Energy & Environmental Monitoring**

ML anomaly detection and CO2 footprint tracking dashboards using

Python, Power BI, and SQL Server.

KEY ACCOMPLISHMENTS

- ◆ Reduced nationwide telecom utility costs by up to **18%** through multi-phase energy optimization.
- ◆ Delivered O&M for STC COW & Mobily ENM networks with proactive outage prevention.
- ◆ Authored automation routines reducing incident resolution time by **30%**.
- ◆ Commissioned **60+ MV/LV assets** under SEC unified contracts with zero-defect SCADA handover.
- ◆ Built AI-driven CO2 & power efficiency dashboard across all STC COW sites.
- ◆ Version-controlled all engineering templates using Git/GitHub workflows.

"You never change things by fighting the existing reality. Build a new model that makes the old one obsolete." — R. Buckminster Fuller
